

PRINCIPAL ACCOUNTS

ALFA LAVAL/ASHBROOK

Industry leading range of centrifuges, belt filter presses and gravity belt thickeners for sludge thickening and dewatering.

AMIAD

Water filtration solutions: plastic, steel, disc or thread microfiber; manual to fully automatic; filtration levels from 3500 microns to 2 microns.

ANUA

Monoshell biofiltration odor control.

AWI

Low profile, stainless steel underdrains for retrofit and new filter applications.

CST COVERS

Aluminum domes and flat covers for water and wastewater tankage.

DE NORA

MIOX and ClorTec market leading onsite mixed oxidant and hypochlorite generation systems, Capital Controls gas chlorination and ozone generation systems, Tetra water and wastewater filters and block underdrains.

DUPONT - MEMCOR

Pressure and submerged state of the art membrane filtration systems for water and wastewater treatment. MemPulse® membrane bioreactors.

ENVIROMIX

Most efficient, low maintenance, uniform mixing systems for water, wastewater and biosolids applications.

F.D. DESKINS, INC.

Proven gravity sludge thickening & dewatering using granular media in over 200 installations.

EVOQUA - CPC

INTERNALIFT® screw pumps.

EVOQUA - DAVCO

Water & wastewater package plants & treatment units, modular clarifiers, dissolved air floatation, GRAVISAND™ filtration systems, sludge dryers.

EVOQUA - DAVIS

Bioxide odor control systems.

EVOQUA - ENVIREX

Orbal & VLR treatment systems, BioMag process, Xpress MBR packaged plants. Captivator energy reducing and anaerobic digestion enhancement process, Non-metallic chain & scrapers, circular scraper, Tow-Bro & Rim-Flo clarifiers, rotating biological contactors (RBC's), submerged biological contactors (SBC's), dissolved air flotation, gravity thickeners, Dystor gas holders, floating digester covers & gas holders, Digester mixing systems, heat exchangers and traveling water screens.

EVOQUA - JET TECH

SBR systems (sequencing batch reactor), disinfection & mixing equipment.

EVOQUA - RJ ENVIRONMENTAL

Packaged and conventional odor control systems and emergency chlorine scrubbers

EVOQUA - ZIMPRO

HYDRO-CLEAR® filters, screw pumps and brush aerators.

INTEGRITY MUNICIPAL SYSTEMS

Packaged, pre-assembled systems for chemical feed, emergency chlorine scrubbing and odor control.

IXOM

MIEX advanced ion exchange resin for dissolved organics and nitrate removal.

JIM MYERS & SONS

Horizontal and vertical flocculators. Stainless Steel Plate Settlers. Material Handling Systems including sludge and screenings conveyor systems.

KRUGER

ACTIFLO® ballasted sedimentation, Hydrotech Discfilter, Phased Isolated Ditch, biological selectors, biological nutrient removal, pure oxygen systems, BioCon indirect belt biosolids dryer, Biostyr biological aerated filter, BioPasteur, AnoxKaldnes MBBR. Odowatch automated electronic-nose-based wireless odor monitoring.

MGD TECHNOLOGIES

Turborator self-aspirating, submerged impeller aerator and mixer.

MFG - MOLDED FIBER GLASS

Weirs and baffles, FRP fabrications.

NETZSCH

Progressive cavity and rotary lobe pumps.

NEXT TURBO

Highest efficiency, most reliable, integrally geared, single stage compressors/blowers.

OREGE

Optimizes the conditioning of sludge by modifying its physico-chemical and rheological properties resulting in improved dewatering performance.

OSTARA

Innovative technology for removing phosphorus and other nutrients from wastewater and recycle them into environmentally safe commercial fertilizer, Crystal Green®. Also, eliminates formation of struvite in plant processes.

PARKSON CORPORATION

DynaSand® and D2 Filter; Lamella® Gravity Settler; HiOx Aeration System; Biolac® Treatment System; Aqua Guard®, Aqua Caiman, Hycor in channel and drum fine screens; Screenings Washers & Compactors; ThickTech Rotary Drum Thickener;

RDP

EnVessel™ Pasteurization process using lime and heat for Class A sludge production, Sludge/lime stabilization systems for Class B sludge production, Hindon Roplex bin dischargers and conveyor systems.

RUKS ENGINEERING

Odor control system based on corona discharge plates that significantly reduce operating and capital costs for odor control.

SALSNES

Efficient, compact primary solids separation with rotating belt filter technology.

THERMAL PROCESS SYSTEMS

ThermAer™ second generation ATTAD and biofilter systems. Thermo System Solar Sludge Dryer.

TROJAN TECHNOLOGIES

Ultraviolet disinfection for wastewater and water treatment.

VELODYNE

Polymer activation, make down and feed systems. Packaged, skid mounted and bulk chemical feed systems.

WEIR WASHER/GILL TRADING

Weir Washer clarifier weir washing without brushes and Eco-Blaster scum, foam, grease, etc. control system.
